

Incubating Cooling Orbital Shakers

Save Incubator Space with Benchtop Orbital Shakers

OHAUS Incubating Cooling Orbital Shakers are designed to incubate samples from 10°C below ambient to 65°C. Incubating Cooling Shaker is designed to hold two microplates or two optional modular tube blocks in a variety of configurations. All models feature touchpad controls with easy-to-read, independent LED displays for temperature, speed and time. Microprocessor control provides consistent uniform shaking action.

Standard Features:

- **Microprocessor-Controlled for Consistent Shaking Action**
The variable speed microprocessor control provides consistent, uniform shaking action. The microprocessor will display the last setpoint and will restart if power is interrupted.
- **Triple Eccentric Drive Provides Reliable Service and Continuous Duty**
Triple eccentric drive with permanently lubricated ball bearings and maintenance-free brushless DC motor provides reliable service and continuous duty operation.
- **Safety Features Include Speed Ramping and Overload Protection**
Unit slowly increases speed to desired setpoint to avoid splashing and features overload protection. Audible and visual signals activate when the system detects an obstruction or tray overload.
