

Rocking & Waving Shakers

Easiest to Use in the Market with Onboard Adjustments for Tilt Angle

OHAUS Rocking and Waving Shakers are designed for use in a range of lab applications in a variety of environmental conditions. Rocking Shakers provide a seesaw-like motion, while Waving Shakers offer a smooth, low-foaming, 3D wave motion for precise speed control. Available in microprocessor-controlled digital models and more economical analog models. All models include a non-slip mat, and most models are available with a stacking tray option.

Standard Features:

- **Microprocessor Provides Precise Control**

Microprocessor control allows for electronic tilt angle adjustment in 1° increments for tilt and 1 rpm increments for speed (digital models) or independent control knobs for tilt, speed and time (analog models).

- **Independent LEDs and Touchpad Control for Speed/Tilt Angle and Time**

Digital models are equipped with LED displays and touchpad controls for speed, tilt angle and time. Timer displays elapsed time or when programmed to a set time, will turn off when time reaches zero.

- **Safety Features Include Speed Ramping and Overload Protection**

Speed ramping feature slowly increases speed to desired setpoint to avoid splashing. Audible/visual signals activate when the system detects an obstruction or tray overload.

Other Standard Features and Equipment

Built-in tray with non-slip rubber mat (included), overload protection with audio/visual alarm on digital models and audible alarm on analog models

Compliance

- **Product Safety:** CAN/CSA C22.2 61010-1, CAN/CSA C22.2 61010-2-051, UL 61010-1, UL 61010-2-051
- **Electromagnetic Compatibility:** ICES-003 Class A, FCC Part 15 Class A
- **Compliance Marks:** TÜV SÜD

Applications

Mixing blood samples, DNA extractions, blotting techniques, staining and destaining gels, hybridizations
